Dear parent/guardian,

Re: Coding and Artificial Intelligence Training Program

Emma High School would like to announce that it is now offering holiday course packages majoring in Web development, Cloud computing, Artificial Intelligence, and Elementary computer programming or coding. This program will impart valuable skills to learners so that they are able to maximize their job opportunities, particularly, in the ICT industry. In addition, this program keeps the learner more productive, focused and ambitious. This program comes to prepare a high school student for their advanced university courses.

Students' response

Based on the research and study we carried out at Emma High School during term one and term two, we discovered a strong enthusiasm from senior one and senior two students. For instance, during term two, the coding club students were able to showcase projects they developed which inspired many students at Emma High School.

Holiday ICT packages

In order to make this program for all students, we decided to offer holiday packages for other students interested in the program. Web development, Cloud computing, Artificial Intelligence, and Elementary computer programming or coding.

The rationale

The coding program intends to prepare a future generation of computer programmers that will solve problems using artificial intelligence. European and other western countries have adopted this program for primary and secondary schools to anticipate the future. Uganda is one of the countries that are still developing to catch up. Therefore, grooming a stable future generation that will solve problems using Artificial Intelligence is a fundamental key to our country's success.

Program Enrolment

Aspiring learners who would like to join this awesome program are advised to register as soon as possible. Please contact:

Mr. Kajubi Donozio with tel No. 0782836479 and email: kajubidon@gmail.com

Mr. Muhangi Thomas with Tel No. 0705662001 and thomasmuhangi@gmail.com

Mr. Hassan with Tel No. 0757794794 and Email: cybarox@gmail.com

Available course packages

Package	Duration	Availability	Fee
Website designing	20 days	05-Jan-23 to 28-Jan-23	UGX 200,000/=
Artificial Intelligence and Cloud computing	20 days	05-Jan-23 to 28-Jan-23	UGX 200,000/=
